POINTE SHOES

NIKOLAY® offers the widest variety of pointe shoes on the market. The number of stock model variations (model, shank, size, width, strength) exceeds 20000, and this number doesn't include the additional technologies, colors, and individual orders with different adjustments!

Often dancers use one particular model of pointe shoes in different shanks depending on the performances they will partake in. And sometimes, they require slight adjustments to their stock model. To make this easier for our customers, we have added a number of technologies and options to fully customize fit, look and even the function of the pointe shoe.

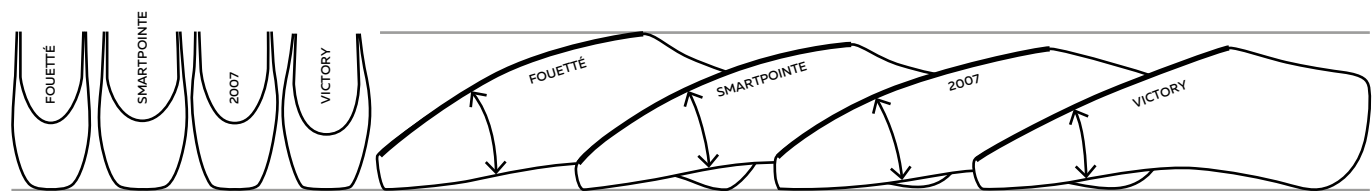

As we've always done since our earliest days, we acquire feedback from professional dancers as well as advanced students to continue to improve our pointe shoe production. By utilizing technological advances and our own creative innovations, we are constantly working to ensure that our pointe shoes are the quietest, the most comfortable and the safest shoes available. Our main focus is the health of all dancers.

All of our pointe shoes pass through three steps of quality control. Under the binding, you can see handwritten characters which designate the shoe technologist, the model number and the date that the shoes were made. This information confirms that your NIKOLAY® shoes were made by our professional shoe makers who are trained artisans in this craft.

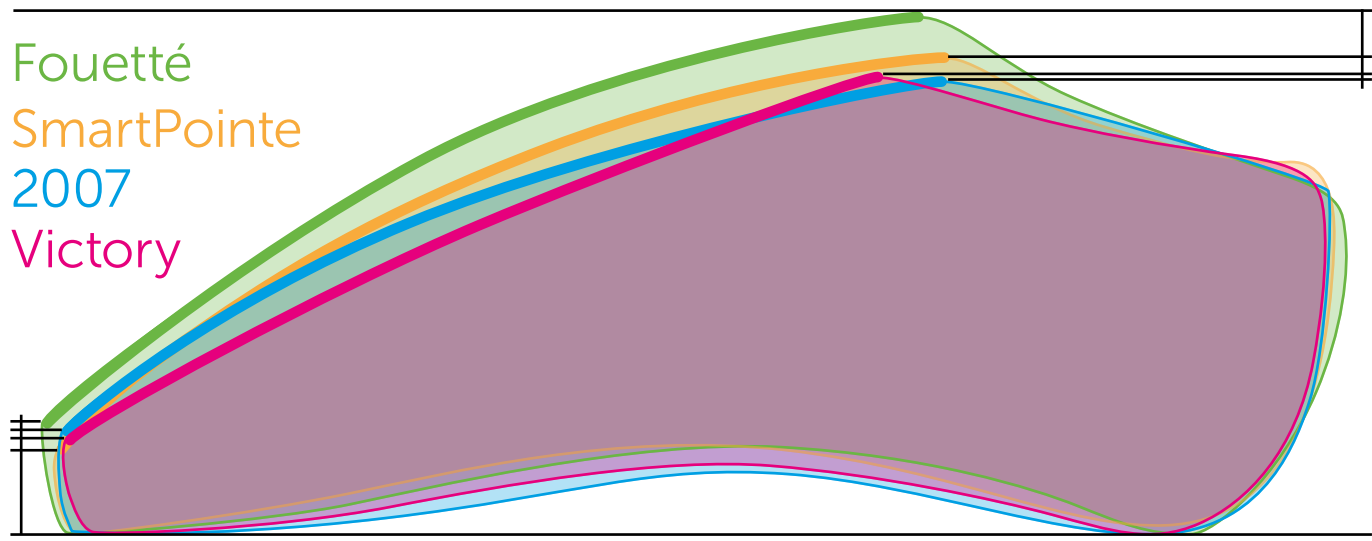

NIKOLAY® POINTE SHOE SYSTEM

We have developed a comprehensive system of pointe shoes based upon the lasts. Each last is made to fit different foot shapes. Most lasts have multiple models that differ in the details: the depth of the vamp, the height of the sides and heel, the material of the insoles, etc. But the internal space of models created on the same last remains the same. Initially we begin with the physical parameters of the foot, so that our pointe shoes are anatomically correct and safe for your feet.

FOUETTÉ SMARTPOINTE 2007 VICTORY

The last is the main attribute, which creates the inner form of pointe shoes. It is the base for proper support, health, and comfort. NIKOLAY® pointe shoes are the most customized in the world. All of our pointe shoes are based on four unique lasts: Fouetté, 2007, SmartPointe and Victory. Each last accommodates different configurations of foot and toe shapes.

HOW TO CHOOSE

The fitter should first choose the last according to the foot shape and toe configuration. And next, consider box, platform, vamp and other features.

NIKOLAY® offers the widest variety of stock models to fit any foot. Our pointe shoes are based on 4 different lasts (forms): 2007, Fouetté, SmartPointe and Victory. Each last is designed to suit a particular foot and toe shape configuration. It is important to feature all four lasts for the perfect fitting experience.

Tamara 0546N

Thanks to its construction, this model offers a pliable yet consistent, supportive shank that forms perfectly to any dancer's arch. The shank is 5 mm shorter in comparison to the Maya model which provides a perfect fit.

The sides are all 5 mm lower when compared to the Maya style. This improved design offers:

- a smooth appearance even en-pointe position, provided by the heel counter which securely hugs the heel,
- a more streamlined fit.

Our incredibly soft microfiber lining adds additional comfort and prevents the shoe from sliding off the foot.

The use of our Miracle glue in the box and wings, offers extreme flexibility and allows these parts to be easily adapted by hand.

This innovative paste works equally well in cold, warm and humid climates.

Elasticated binding provides a snug, secure fit.

SOFT BALLET SHOES

Soft ballet shoes seem simple, but that's only an illusion. For the majority of a dancer's career, they will be training in ballet flats, and finding a perfect shoe can be challenging. We've created different styles to work for dancers of every level and feet form.

We use canvas, stretch canvas, leather, or satin to offer dancers the choice they deserve. The outsole is usually suede, but we can replace it with the cruelty-free VEGAN option on request in split sole models.

HOW TO CHOOSE

Soft ballet shoes require the same accurate fitting as pointe shoes do. Ballet flats underline the feet, protect them and support the way it’s needed if they follow the shape perfectly and their features meet the dancer’s needs.

Soft pleats and binding make it easy to fit soft ballet shoes to different feet forms, yet the toe lengths vary and requires different vamps. The arch and feet strength also matter, therefore we created this chart to assist you in choosing the soft ballet shoes of your DREAM.

HOW TO FIND YOUR RIGHT SIZE

- How to measure and identify NIKOLAY® pointe shoe size:
- 1) Take a piece of A4 paper and put ballerinas' foot on it, draw the contour of the foot with a pencil; the pencil should be held under an angle of 90° (perpendicularly). Draw and measure the left and right foot, as they can differ.
 - 2) Measure the distance from the heel to the endpoint of the toe (in mm);
 - 3) Find the result of the measurements in the table. In case the measurement in between two sizes, we recommend taking a bigger one, as pads and tights also have a certain thickness.

How to choose the width

NIKOLAY® offers pointe shoes in 7 different widths:
N – for extremely narrow feet
X – for narrow feet
XX and XXX – for medium feet
XXXX – for wide feet
XXXXX-XXXXXX – for super wide feet

Measure your foot at its widest place (where the bunions are) to identify the required width for the pointe shoes. Relate the result to the table data and identify your width. It is recommended to choose a width that provides a firm and painless fit. If you notice wrinkles on the fabric and gaps between the shoe and the foot, it means you need less width.
